SKILLS

Languages & data
Java · Python · SQL · PostgreSQL · Data modeling · Statistics

Artificial intelligence
Machine learning · Pattern recognition

Software engineering
Architecture · Design patterns · UML · Requirements · Testing · Interface design

Systems & security
Linux · TCP/IP · Cryptography · Data protection · Risk analysis

Algorithms & management
Algorithms · Data structures · Numerical analysis · Scrum

Soft skills
Problem solving · Teamwork · Communication · Adaptability

LANGUAGES

Spanish — Native

English — Full Erasmus year taught in English

Rodrigo Portugal

Computer Engineering student · AI & software development

Open to internships and junior roles

PROFILE

Final-year Computer Engineering student at the University of Burgos, with a solid foundation in software engineering, data and artificial intelligence, cybersecurity, algorithms and agile project management.

I spent a full Erasmus+ academic year at the University of West Bohemia (Plzeň, Czech Republic), studying in English in an international environment. I am looking for an opportunity to apply what I have learned and keep growing, especially in artificial intelligence and software development.

EDUCATION

BSc in Computer Engineering — 2022 – 2027

University of Burgos · Burgos, Spain

Software engineering, data and artificial intelligence, cybersecurity, mathematics and algorithms, and agile project management.

Erasmus+ Exchange Student — Sep 2025 – Jun 2026

University of West Bohemia (ZČU) · Plzeň, Czech Republic

Full academic year with courses taught in English, focused on artificial intelligence and software development.

EXPERIENCE

Production Operator — Jun – Jul 2025

L'Oréal · Burgos · Full-time

Assembly and preparation of products on a production line, meeting quality standards and production targets.

Quality control · Assembly line · Workplace safety · Teamwork

PROJECTS

Personal portfolio — COMPLETED — 2026

Bilingual website with light and dark modes, published on GitHub Pages. All content comes from a single data file, so adding projects takes seconds.

HTML · CSS · JavaScript · GitHub Pages

Bachelor's thesis — UPCOMING — 2026 – 27

Final-year project, to be developed during the second semester of 2026-27.

KEY COURSES

ZČU · Plzeň
- AI and Pattern Recognition
- Machine Learning
- Database Systems
- Software System Architectures
- Numerical Methods

University of Burgos
- Software Engineering
- Computer Security
- Project Management
- Computer Networks
- Human-Computer Interaction
